ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: DETACHABLE WHEEL COVER

(57) Abstract: A detachable wheel cover for a trolley, pushchair or the like comprises a sub-
stantially cylindrical part (1) which is adapted to fit around the periphery of a wheel (11), a
first side (2) adapted to cover one side of the wheel (11) and a second side (3) adapted to cover
the other side of the wheel (11). The edges of the sides (2,3) are secured to the edges of the
substantially cylindrical part (1) by stitching and/or adhesive. An opening which is closable by
a flap (4) is provided in the side (2) so that the wheel (11) can be inserted into the cover. Once
the wheel has been inserted, the flap (4) can be folded to close the opening and the flap can be
held in position by releasable fastening means such as "Velcro" (Registered Trade Mark). An
axle (12) on which the wheel (11) is mounted extends through a small central aperture (8) in
a central region of the side (3) of the cover.
